

[Important] Good to know before enrolling MacBook **Before Enrolling a New MacBook**

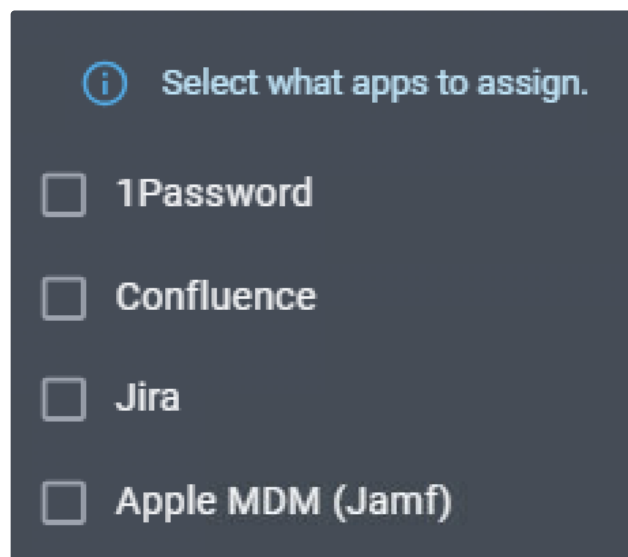

When you enroll a new MacBook, make sure the user is added to the “**tb-all-mdm-apple**” group in OKTA.

tb-all-mdm-apple

Group for all mdm apple users. Group gives access to Jamf Connect/Password and Apple Business Manager SSO/SCIM

Users can be added to this group via '**Bifrost**'

Select the option 'Apple MDM (Jamf)'

Being in this group gives the user access to the following OKTA applications:

- **Jamf Connect - Login Window**

- Allows users to sign in to their Mac using their OKTA account when the Mac starts.
- **Jamf Connect - Password Check**
 - Keeps the Mac password and the OKTA password in sync, so users don't end up with two different passwords.
- **Apple Business Manager SCIM**
 - Automatically creates and updates user accounts in Apple Business Manager based on OKTA.
- **Apple Business Manager SSO**
 - Lets users sign in to Apple services (like iCloud) using OKTA Single Sign-On, instead of creating separate Apple IDs.
